

Stuart, Kaz ORCID: <https://orcid.org/0000-0002-7952-5779> (2009) Narratives as action research tools in interprofessional contexts. In: 33rd Collaborative Action Research Network (CARN) International Conference, 30 October - 1 November 2009, Athens, Greece. (Unpublished)

Downloaded from: <http://insight.cumbria.ac.uk/id/eprint/240/>

Usage of any items from the University of Cumbria's institutional repository 'Insight' must conform to the following fair usage guidelines.

Any item and its associated metadata held in the University of Cumbria's institutional repository Insight (unless stated otherwise on the metadata record) may be copied, displayed or performed, and stored in line with the JISC fair dealing guidelines (available [here](#)) for educational and not-for-profit activities

provided that

- the authors, title and full bibliographic details of the item are cited clearly when any part of the work is referred to verbally or in the written form
 - a hyperlink/URL to the original Insight record of that item is included in any citations of the work
- the content is not changed in any way
- all files required for usage of the item are kept together with the main item file.

You may not

- sell any part of an item
- refer to any part of an item without citation
- amend any item or contextualise it in a way that will impugn the creator's reputation
- remove or alter the copyright statement on an item.

The full policy can be found [here](#).

Stories and Narratives

Action Research Tools for
Inter-professional Work,
Youth Development and
Impact Evaluation

Story vs narrative

- Story = An account or recital of an event or a series of events, either true or fictitious. Stories are not necessarily grounded in reality.
- Narrative = A narrative is some kind of retelling of something that happened (a story). The narrative is not the story itself but rather the telling of the story. Narratives are grounded in reality.

3 contexts

- Professional development
- Youth development
- Impact Evaluation /Action Research /
Narrative Inquiry

Multi professional development

- Integrated services for children and young people (Children Act 2004)
- Mediate new identities (McKimm 2009)
- 'Glue' communities of practice (Wenger 2006)
- Embody situated learning

Youth development

- Children and young people are facing complex multi faceted transitions (NCH 2007) and paradoxical transitions both a child and an adult (Balzagetten 2010)
- Transitions = developing new identities
- Culturally situated learning
- Experiential learning

Impact evaluation

- Identifying learning and behavioural changes (Kirkpatrick 1975)
- Rich and multifaceted, offer new insights and collaborative techniques (Broussine 2008)
- Thick description (Geertz) + Multiple layers of analysis
- Validity not necessary, impartiality not a goal, 'truth' not sought.

How do you use stories or
narratives?

What is a story or narrative?

“[they have] plots and characters, generating emotions in narrator and audience through poetic elaboration of symbolic material. This material may be a product of fantasy or experience, including an experience of earlier narratives. Story plots entail conflicts, predicaments, trials, coincidences and crisis that call for choices, decisions, actions and interactions and purposes”. Gabriel (2000:239)

Identity forming

- Processing experiences (Bettleheim 1976)
- Sense making tools (Boje in Simpson 2008)
- Intrinsic parts of being human (Maguire 1998)
- Emancipatory (Propp 1984)
- Represent our chosen 'life script' (Steiner 1974)

Narratives as Experiential Learning / Action Learning

Kolb 1984

- Active experimentation (plan)
- Concrete experience (do)
- Reflective Observation (review)
- Abstract conceptualisation (apply)

McNiff 1998

- Planning
- Researching
- Analysing
- Conceptualising
- Doing something different

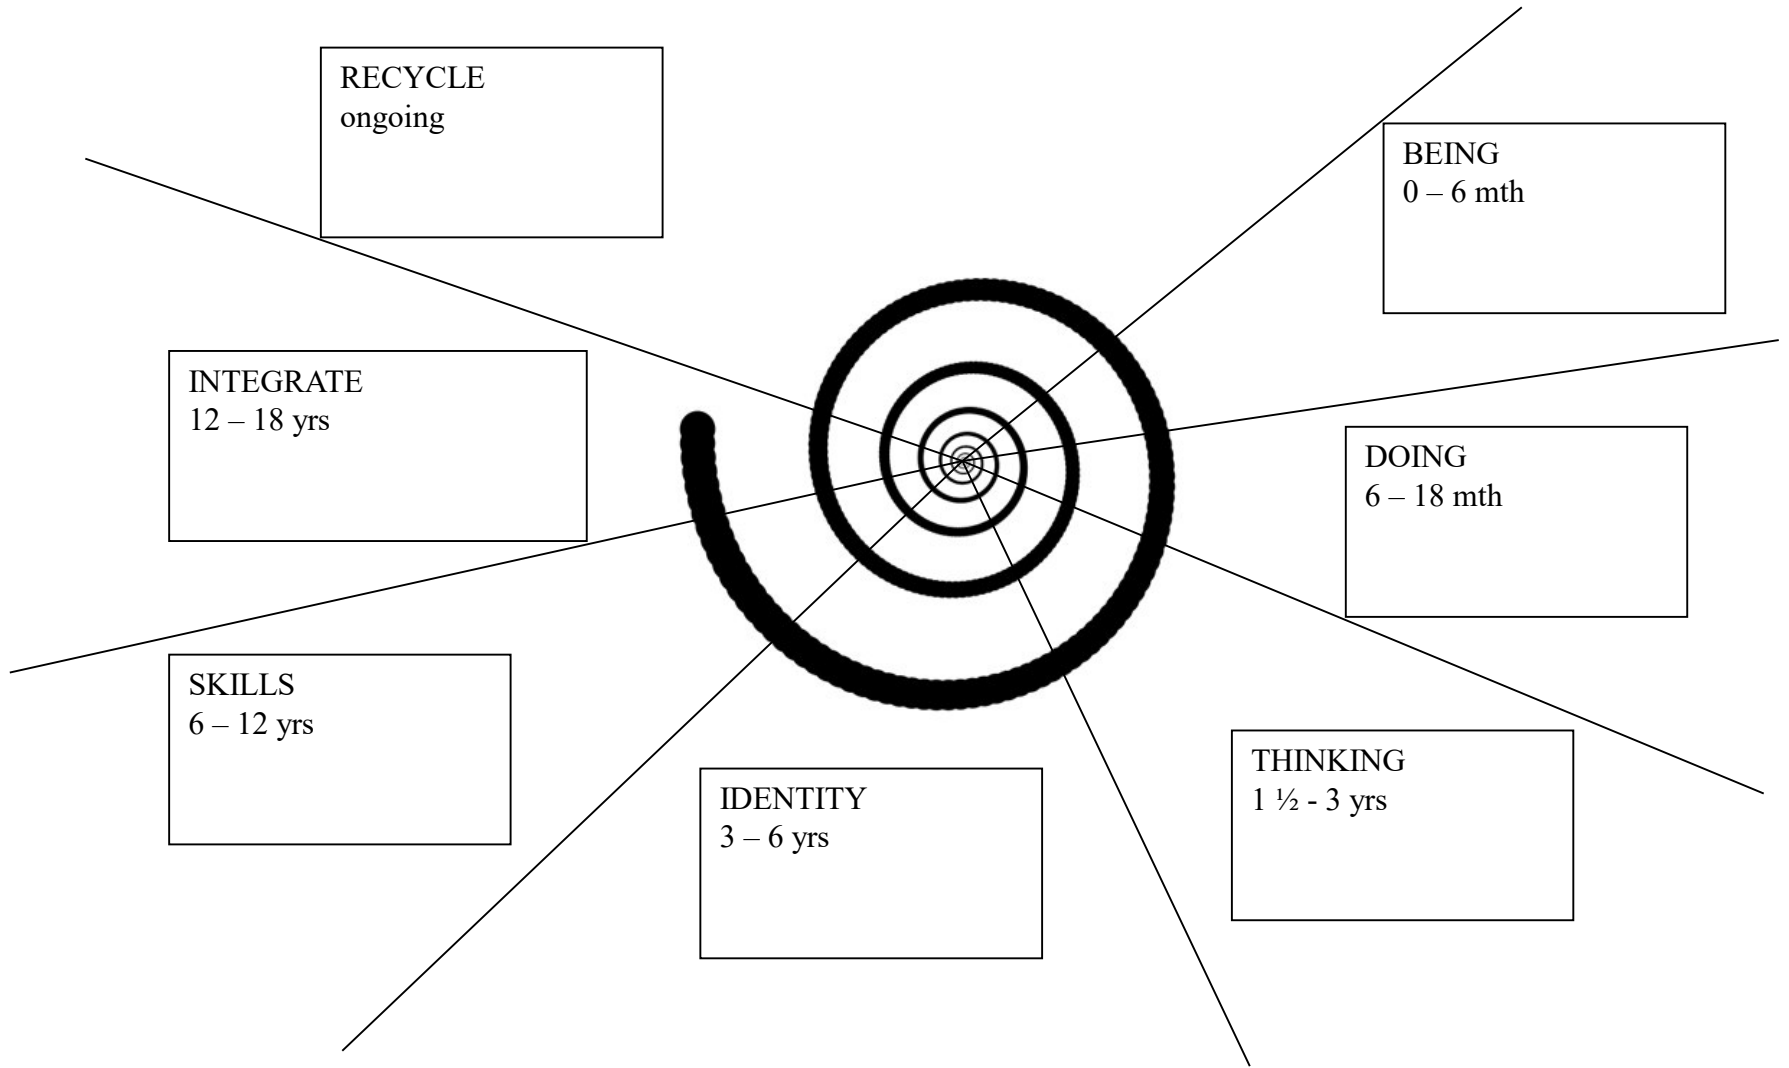

- “...stories are the closest we can come to experience as we and others tell our experience. A story has a sense of being full, a sense of coming out of a personal and social history.... Experience is the stories people live. People live stories and in the telling of them reaffirm them, modify them, and create new ones”.

(Clandinin & Connelly, 1994, p415)

Narratives as socially constructed situated learning tools

- Repositories of situated experience (Denning 2005)
- Practice development tools (Clandinin and Connelly 1994)
- Mediate shared understandings (Koch 1998)
- Laden with individual and group meanings
- Create communities of practice (Wenger 2006)

So lets do some...

Pam Levin Cycle of Development 1992

My pedagogical approach

- Arrive into a magical storytelling room
- Build rapport and establish a safe emotional environment.
- Introductions and ice breakers.
- Model story telling as a personal introduction
- Invite them to decode the story
- Think (silently) of an example of their current situation
- Reflect (silently) which story (broad range) it would it be and why.
- At this point they share the story with a peer or small group of colleagues, but do not necessarily expose its link or relevance to real life.
- Plenary session and literally 'walk' through a developmental model (Levin's 1992 Cycle of Development is ideal).....

- Back in pairs or small groups, they reflect on what might be the needs of the central character of the story.
- Individual (silent) reflection again and consider the ending that they would like to happen in the story. They can add anything they like to achieve that – a new character, tool, setting, prop.
- Back in pairs they share their new amended stories.
- They individually reflect on the learning and write action points to take back and apply into their context.
- In a group review they share experiences and realisations to establish common meanings (without going back into the stories).
- Closing ceremony and departures.

Multi professionals

- 40 international + 30 UK based
- “Your workshop just helped me to reach a difficult life decision that I have struggled with for years!”
- “Making a new ending for a story for me is now a coping strategy for things that stress me out!”
- “ I never thought I was so resourceful – but everyone always follows the pied piper. I don’t think that they are all rats though!!”
- “we nearly didn’t show up to ‘storytelling’, but are so glad that we did – what rich learning!”

Youth Development

- The 'Twitts' in a mountain hut.
- My journey – narrative timelines.
- My favourite story ever...and why...
- Metaphorical teaching
- What I heard was...what it means to me was...
- If I could be any character.
- Sound bytes.
- 'My story'
- 'Happily ever after'

Impact evaluation

- Video clips / sound clips on DVD / YouTube / website
- Transcribed stories / excerpts
- Thematic coding of issues
- Open coding of key areas of development
- Thematic coding of elements of story
- Discourse analysis

Five new themes...

- Disclosure
- Self realisation
- Psychological depth
- Solution focused
- Validation, reframing, unconscious connections, 'new' and magic.
- [beware metanarratives]
