The Art and Science of University Branding
Endowed Chair in Business, Schroeder School of Business, University of Evansville.

- Dr. V. Kumar, Regents Professor; Richard and Susan Lenny Distinguished Chair in Marketing; and Executive Director, Center for Excellence in Brand and Customer Management, Robins College of Business, Georgia State University.
- Dr. Francisco Guzman, Associate Professor of Marketing, and editor, Journal of Product and Brand Management. (Also the session moderator)
- Rex Whisman, Chief Strategist, BrandED Consultants Group
- William Faust, Senior Partner, and CSO, Ologie Higher Ed Branding and Marketing
Master Class Sessions – Pre-registration Required

Abstract:
In this Master Session, we will consider a variety of issues regarding the proper estimation, testing, and interpretation of interaction effects. This will include proper interpretation of simple effects given how variables are coded and how to recode variables in order to test specific values (spotlights and floodlights). In addition, we will discuss issues regarding statistical power in testing interactions and simple effects, options for visualizing interactions, and the importance of key assumptions underlying such tests.

Bio:
Stephen Spiller is an Associate Professor of Marketing and Behavioral Decision Making at the UCLA Anderson School of Management, where he has been since 2011. His research examines the psychology of fundamental economic concepts. This includes how and when people consider their opportunity costs, how they plan for the future, how they reason about product differentiation, and how they think about stocks versus flows. He also works to translate and disseminate best practices in data analysis for behavioral researchers. Stephen's work has been published in leading journals including Journal of Consumer Research, Journal of Marketing Research, Management Science, Psychological Science, and Journal of Consumer Psychology. He was named a 2017 MSI Young Scholar and was a finalist for the Journal of Marketing Research’s William F. O’Dell Award in 2018. Stephen received his PhD in marketing from Duke University and his BA in psychology and economics from the University of Virginia.

Introduction to Machine Learning Methods: What you Need to Know to Conduct and Interpret Research with ML presented by Allison Chaney

Abstract:
Machine learning bears the promise to transform research by discovering patterns hidden in data. Those patterns can then be used to make predictions, approximate concepts that cannot be measured directly, or explore the data through the lens of the learned (or “inferred”) patterns. This session will provide a practical introduction to machine learning methods in two parts. First, we will cover a broad overview of machine learning techniques and software packages. Then, we will delve into a sequence of short case studies to help session participants gain a deeper understanding of popular machine learning methods and to illustrate common challenges and pitfalls that researchers might encounter when using these techniques.

Bio:
Allison Chaney is an Assistant Professor at the Fuqua School of Business at Duke University. Her research is at the intersection of machine learning and marketing, focusing on developing scalable and interpretable machine learning methods and understanding the impacts of these methods on individuals and society when they are deployed in real-world markets. She received her Ph.D. in Computer Science at Princeton University, under the advisement of David Blei. She holds a B.A. in Computer Science and a B.S. in Engineering from Swarthmore College and has worked for Pixar Animation Studios and the Yorba Foundation for open-source software; she has also collaborated with the research teams at eBay/Hunch, Etsy, and Microsoft Research.

Friday, August 9
Demystifying Structural Models: What they are and why they are (still) useful presented by Brett Gordon

Abstract:
Structural models—empirical models grounded in economic theory—have grown to represent a significant portion of empirical research in marketing. However, for the uninitiated, structural models can be daunting: too much math, too little intuition, and perhaps the question “Why are we doing all this?” lurking in your head. My goal is to demystify structural models, to explain what they are and why they can (sometimes) be useful. To this end, I’ll present the workhorse model from Berry, Levinsohn and Pakes (1995) (“BLP”), using it as a vehicle to illustrate core concepts such as a microeconomic model of demand, sources of endogeneity, justifying instrumental variables, insights from incorporating a (firm) supply-side model, and the importance of counterfactuals. My emphasis will be on interpretation and intuition, and not on econometrics and implementation, such that the content should be accessible to anyone interested.

Bio:
Brett R. Gordon is Associate Professor of Marketing at the Kellogg School of Management at Northwestern University. His research interests focus on building quantitative methods to assess the performance of marketing actions, particularly those around pricing, promotion and advertising, leveraging tools from empirical industrial organization, econometrics and machine learning. His recent work, conducted in collaboration with various companies, has emphasized how to design field experiments to answer meaningful business problems. His research has been published in the American Economic Review, Journal of Marketing Research, Journal of Political Economy, Marketing Science, and Quantitative Marketing and Economics. He currently serves on the Editorial board at Marketing Science and the Journal of Marketing Research and is an Associate Editor at Quantitative Marketing and Economics. Professor Gordon holds a Ph.D. in Economics from Carnegie Mellon University and started his academic career on the faculty of Columbia Business School before moving to Kellogg in 2014.
Abstract

The Master Class will cover an overview of qualitative research in marketing journals. The session is based on a literature review of qualitative research in marketing journals focusing on how the demands on rigor and relevance has shaped the research methodology in published studies. It also highlights recent developments in qualitative research such as text mining, netnography and the use of multi-methods. The master class will cover the demands of what is needed to get published when using qualitative research methodology in a marketing journal (ranging from IMM, JSR, JAMS and JM). In particular it discusses the demands on sample size, type of analysis, descriptions of analysis, use of software and how these demands have developed over time. The master class is based on a review of existing qualitative research, examples and interactions between participants.

Biography

Dr. Lars Witell, is Professor at the Service Research Center (CTF) at Karlstad University, Sweden. He also holds a position as Professor in Business Administration at Linköping University, Sweden. He has received several nominations and rewards for his research and has been published in scholarly journals such as Journal of Service Research, Industrial Marketing Management, and Journal of Business Research; as well as in the popular press, such as The Wall Street Journal. Lars has also been a visiting professor at UQ Business School, Chalmers University of Technology and Queen Mary University of London, as well as visiting scholar at University of Michigan and Stanford University.

Sponsorship-Linked Marketing: Towards a Managerially Relevant Perspective
SIG PROGRAMMING
Session Chair: Lane Wakefield, Mercer University

Practitioners in sport marketing often critique academic research as being confusing and subsequently inapplicable. To their point, researchers could do a better job of selecting practical topics and streamlining hypotheses, models and implications. To that end, this special session features four papers that address pertinent issues and have clear consequences for sponsors and/or the properties sponsored. Topics include the effective measurement of sponsorships, the impact of an athlete’s transgression on sponsors, and branded sports stadiums.

Empirical Generalizations about the Relative Efficiency of Individual Sponsorships Assets: Evidence from the NFL
Kirk Wakefield, Baylor University, Lane Wakefield, Mercer University, and Daniel Zantedeschi, Ohio State University

Exploring the Evidence of Social Desirability Biases in Consumer Responses to Sponsors
Youngho Park, Dae Hee Kwak, University of Michigan

In for a Penny or in for a Pound? The Impact of Athlete Transgressions on Team Sponsors
David L. Alexander, St. Thomas University, & Ashley Stadler-Blank, Xavier University
**Branded Sports Stadiums: The Roles of Sponsorship Sincerity and Consumer Gratitude on Building Customer Value**
Russell Lacey, Xavier University

4:15:00 PM - 5:30:00 PM
Journal of Marketing Best Paper Award Session

This session will celebrate and discuss JM’s three award-winning best papers.

Thought Leaders in Entrepreneurial Marketing on the Past, Present, and Future Directions of the Field
SIG PROGRAMMING

Moderators: Todd Morgan, Assistant Professor, Western Michigan University
            Can Uslay, Associate Professor, Rutgers University

Panel Members:
   Jenny Darroch, Henry Y. Hwang Dean, Professor, and Drucker Brand Champion, Peter F. Drucker and Masatoshi Ito Graduate School of Management, Claremont Graduate University
   Ken Matsuno, Professor, Babson College
   Michael Morris, Professor of Entrepreneurship and Social Innovation, Keogh School of Global Affairs, University of Notre Dame
   Jagdish Sheth, Charles H. Kelstadt Chair in Marketing, Emory University

The field of the Marketing and Entrepreneurship Interface has been researched for over 30 years. In today’s marketplace, firms are faced with growing uncertainty, technological turbulence and quickly changing consumer preferences (Alqahtani and Uslay, 2017). These aspects of rapidly changing environments render traditional marketing strategies ineffective and obsolete (Whalen et al., 2016). Consequently, this has led to the growth of entrepreneurial marketing (EM), the “proactive identification and exploitation of opportunities for acquiring and retaining profitable customers through
innovative approaches to risk management, resource leveraging and value creation” (Morris et al., 2002, p. 5). This convergence of thought and practice at the interface of marketing and entrepreneurship allows firms to develop appropriate strategies to deal with rapidly changing environments, lack of economies of scale, resource constraints, limited geographic presence, limited brand image, and limited market share, among others (Whalen et al., 2016). An overwhelming portion of research on EM suggests that either directly or indirectly, it has a largely positive influence on firm performance (Morrish et al., 2010; Jones et al., 2013).

While research on EM has brought about fruitful findings, much work remains. Research has been fragmented, an underpinning theoretical framework has not emerged, and empirical research, including scale development, has been lacking. This special session will include a panel of thought leaders at the research interface of marketing and entrepreneurship. We have four thought leaders and one moderator for the discussion on past, present, and future directions of the field. This includes theory, empirical research, relevance in today’s marketplace, scale development, and research priorities.

9:15:00 AM - 10:30:00 AM Room 09
Teaching Marketing Analytics: Sharing Experiences, Lessons, Recommendations

Session Chair:  Professor Gary L. Lilien, Penn State and University of Technology, Sydney; Glilien@psu.edu
Panelists:
Professor Michael Braun, Southern Methodist University; braunm@mail.smu.edu
Professor Arnaud De Bruyn, ESSEC Business School, France; debruyon@essec.edu
Professor Mahima Hada, Baruch College, CUNY; Mahima.Hada@baruch.cuny.edu
Professor Alan Malter, University of Illinois, Chicago Circle; amalter@uic.edu
Professor Wendy Moe, University of Maryland; wendy_moe@rhsmith.umd.edu
Professor Arvind Rangaswamy, Penn State; arvindr@psu.edu

In the last few years we have seen a radical change in the field of marketing...from a profession where marketing jobs demanded minimal analytical skills to one where those analytic skills (combined with an understanding of both customer behavior and firm processes) are now essential for employment. That change has driven a corresponding change in how marketing and marketing analytics are taught at all levels, both in stand-alone courses and in modules in other courses in the marketing curriculum. The panelists will share one key challenge they faced in their experience of teaching marketing analytics, how they addressed that challenge and their recommendations or take-aways.

An enduring theme in research in the strategic marketing domain is the role of marketing resource allocations as well as marketing-mix variables in explaining brand or firm performance and enhancing or protecting firms’ investments in their market-based assets. With marketing managers facing increased accountability and scrutiny to defend their strategic choices, the identification and measurement of marketing’s influence on brand or firm performance is clearly a timely, important and relevant issue to address. However, anticipating and accurately attributing performance outcomes to specific marketing tactics and resource allocations remains challenging, due to the multitude of internal as well as external contingency factors marketers face.

AWARDS LUNCHEON
02:00 PM-03:45 PM  
**MASTER CLASS SESSIONS – PREREGISTRATION REQUIRED**  
**Running Studies Online** presented by Joe Goodman  

**Abstract:**  
This Master Session will primarily discuss the most common source for online data collection in marketing academia, Mechanical Turk, with a brief discussion of other tools (e.g., TurkPrime) and platforms (e.g., Prolific, Positly, etc.) available to enhance data collection online. We will discuss (1) the current trends and opinions of marketing academics towards online data collection, (2) common issues (both myths and facts) with online data collection, and (3) best practices and solutions to address many of these issues. While the session will discuss current research on these topics, it will also be an interactive discussion where attendees will be encouraged to ask questions, share their experiences, and provide insights as well. No prior knowledge of Mechanical Turk or online data collection is required, but some background knowledge may be beneficial.

**Bio:**  
Joe is an Associate Professor of Marketing at The Ohio State University's Fisher College of Business. His research interests include consumer happiness and well-being with material and experiential purchases; how consumers manage large product assortments; and the role of crowd-sourcing tools, such as Mechanical Turk, in marketing research. His research has appeared in the requisite journals (JCR, JMR, JCP, JBDM, JACR, OBHDP) and he has taught various courses at all levels. He joined Fisher in 2016 and received his PhD in Marketing from The University of Texas at Austin. Prior to being a Buckeye, Professor Goodman was on the faculty at the University of South Carolina and Washington University in St. Louis, where he co-founded the CB Research Lab. He enjoys traveling, running, acting like his kids, Europe '72, and consuming in the natural habitat.

02:00 PM-03:45 PM  
**Machine Learning for Casual Inference** presented by Mitch Lovett  

**Abstract:**  
This Master Class is intended to be a primer to harnessing machine learning methods to measure causal effects from observational data. An active area of recent methodological research, this workshop will overview two distinct methodological areas: (1) Lasso-IV and the broader set of double machine learning methods and (2) synthetic controls and related matrix completion methods. Each of these streams of methods will be illustrated with marketing applications. Applications measure the causal effect of advertising expenditures, marketing events, and retail entry. Participants will be introduced to practical implementation of these methods in R using freely available software packages.

**Bio:**  
Mitchell J. Lovett, Associate Professor of Marketing joined the Simon Business School at the University of Rochester in 2008 when he earned his PhD at Duke University. His research focuses on applying and developing empirical methods to study marketing phenomenon. His research interests include advertising, branding, word-of-mouth, political marketing, consumer and firm learning, retailing, conjoint analysis, and platforms. His research has been published in scholarly journals including Marketing Science, the Journal of Marketing Research, and Quantitative Marketing and Economics. His paper “On Brands and Word of Mouth” was a finalist for the William F. O’Dell award for long-term impact, and his early body of research earned the Marketing Science Institute’s Young Scholars distinction. His research has garnered national media attention including citations in the New York Times.
and Ad Age. At the Simon School, he is an award-winning teacher who teaches Marketing Research, Marketing Strategy, and PhD Seminars in Quantitative Marketing.

02:00 PM-03:45 PM

**Best Practices in Theory Development by Ajay Kohli**

Abstract:
The purpose of this session is to help participants better understand the nature of a theory, the theory construction process, and to develop skills in building interesting and impactful new theory. The focus of the workshop is on nuts and bolts of building new theory (and not on philosophy of science). We will discuss the following questions:

1. What is the purpose of a theory?
2. What is a theory, and what are its key components?
3. How does one develop persuasive arguments for supporting theoretical propositions of different types (main effects, interaction effects)?
4. How does theory construction differ from theory application?
5. What are the characteristics of an impactful theory?
6. How does the theory construction process work? What factors help construct impactful new theory?
7. How does the “theories-in-use” approach for constructing new theory work?

Bio:
Ajay K. Kohli is Regents’ Professor and Gary T. and Elizabeth R. Jones Chair at Georgia Tech. His research focuses on market orientation, customer solutions, sales management and B2B marketing. He has worked in industry for six years.

Professor Kohli is a former Editor-in-Chief of the Journal of Marketing, and currently serves as Associate Editor, Journal of Marketing, Journal of Marketing Research, and Area Editor, International Journal of Research in Marketing.

He has received three honorary doctorates, and is an AMA Fellow, EMAC Fellow, and ISBM Fellow. His research has been cited over 34,000 times. He has received several career awards including the AMA/McGraw-Hill/Irwin award, the Paul D. Converse award, and the IIMC Distinguished Alumnus award. He is the recipient of several “best paper” awards including the Sheth Foundation / Journal of Marketing award (twice), the ISBM-David T. Wilson-Sheth Foundation award, the Alpha Kappa Psi award, and the AMA SERVSIG award.

Dr. Kohli’s undergraduate degree is from IIT-Kharagpur, PGDM (MBA) from IIM-Calcutta and Ph.D. from the University of Pittsburgh.

02:00 PM-03:45 PM

**Consumer Neuroscience 101: Tools, Applications and Challenges presented by Carolyn Yoon**
Brand marketers are estimated to have allocated more than $43 billion in sport sponsorship on a global basis in 2017, and spending was estimated to have increased more than 4% in 2018. Nearly 25 years since the seminal paper on sponsorship-linked marketing (Cornwell, 1995) was published, academic research on the subject has had a similar trajectory, with several recent papers on sponsorship published in the Journal of Marketing (Keller et al., 2019; Mazodier et al., 2018; Woisetschläger et al., 2017). Despite this remarkable ascension, there is more we can learn. Thus, the purpose of this special session is to attract papers that extend what we currently know about sponsorship-linked marketing by creating new knowledge. Consistent with the conference theme of “Marketing on fire: Burning questions, hot new methods, and practical ideas worth spreading,” included within are a series of papers utilizing a variety of divergent methodologies to extend the sponsorship-linked marketing literature in a number of new areas and contexts.

**Sponsorship message processing in live broadcasts: The role of game outcome uncertainty and emotions**

**Conceptualizing Authentic Sponsorship Engagement**
T. Bettina Cornwell (University of Oregon)
Returns, Risk, and Control in Inter-Organizational Businesses

**Session Chair:** Desmond Lo, Santa Clara University

The papers to be presented have the common theme of inter-organizational relationships. Nezami, Tuli, and Dutta examine the growth of cloud-based solutions and its effect on stock returns and idiosyncratic risk for in the software industry. They also look into how a firm’s marketing capabilities moderate such effect. Krishnaraju, Kacker, and Hibbard examine both the positive, beneficial and negative, harmful effects of commitment in enterprise businesses. They propose a novel theoretical framework and test some of its hypotheses through a primary data set. Our last presentation concludes by studying how control mechanisms can mitigate risk, opportunism, and enhance compliance. Using franchising data, Tong and Crosno identify the importance — and difference — of environmental uncertainty and relationship as moderation factors in how a control system achieves different types of compliance.

**Above the clouds: Performance analysis of offering cloud computing in the software industry**
Mehdi Nezami, Gies College of Business, University of Illinois at Urbana-Champaign
Kapil R. Tuli, Lee Kong Chian School of Business, Singapore Management University
Shantanu Dutta, Marshall School of Business, University of Southern California

**Commitment and Opportunism in Interorganizational Relationships**
Vidhya Krishnaraju, Doctoral Student, DeGroote School of Business, McMaster University
Manish Kacker, Associate Professor, Marketing, DeGroote School of Business, McMaster University
Jonathan D. Hibbard, Assistant Professor of Marketing, Questrom School of Business, Boston University

**Examining the Control-Compliance Relationship under Environmental Uncertainty and Dependence**
Pui “Yoshi” Tong, Assistant Professor, Illinois State University
Jody L. Crosno, Associate Professor West Virginia University

Retail Technology Acceptance Model For Online At Offline (O@O): Comparing Different Generations Of Data Analysis Techniques
Sookhyun kim
East Tennessee State University

Technological advances continue to alter the way firms interact with customers and how customers, in turn, interact with firms. Often times, these interactions occur in online, public spaces. One byproduct of
this is the explosion of publicly accessible data; the era of big data. This data is often freeform, unstructured text with different implications on the types of analysis necessary to use it in making theoretical inferences.

The goal of the session is to bring together researchers from different perspectives that are using unstructured data such as social media posts, customer forums, and customer reviews to understand consumer interactions with each other or consumer interactions with firms. We will discuss strategies about how to approach the “unstructured” nature of this data, common challenges that arise in working with this data, inspiring new opportunities and new trends. We expect the sessions will offer a good blend of conceptual and empirical discussion that will attract scholars not only from relationship marketing, but also from consumer behavior, marketing strategy, interorganizational, public policy, and sales special interest groups.
