Usage of any items from the University of Cumbria's institutional repository 'Insight' must conform to the following fair usage guidelines.

Any item and its associated metadata held in the University of Cumbria's institutional repository Insight (unless stated otherwise on the metadata record) may be copied, displayed or performed, and stored in line with the JISC fair dealing guidelines (available [here](#)) for educational and not-for-profit activities

provided that

- the authors, title and full bibliographic details of the item are cited clearly when any part of the work is referred to verbally or in the written form
 - a hyperlink/URL to the original Insight record of that item is included in any citations of the work
- the content is not changed in any way
- all files required for usage of the item are kept together with the main item file.

You may not

- sell any part of an item
- refer to any part of an item without citation
- amend any item or contextualise it in a way that will impugn the creator's reputation
- remove or alter the copyright statement on an item.

USING MOOCS TO PROVIDE PRE-ENTRY SUPPORT AT THE UNIVERSITY OF CUMBRIA

MIND THE GAP

Lesley English

 Cumbria_Lesley

THIS SESSION WILL...

- Explore the challenges of academic skills delivery at the University of Cumbria
- Introduce the team and their skills set
- Present Head Start – our first pre-entry skills module
- Take you on a journey... from Head Start to MOOCs
- Report on small scale research
- Reflect on the benefits and challenges of creating + maintaining pre-entry modules
- Look at the future of our pre-entry portfolio

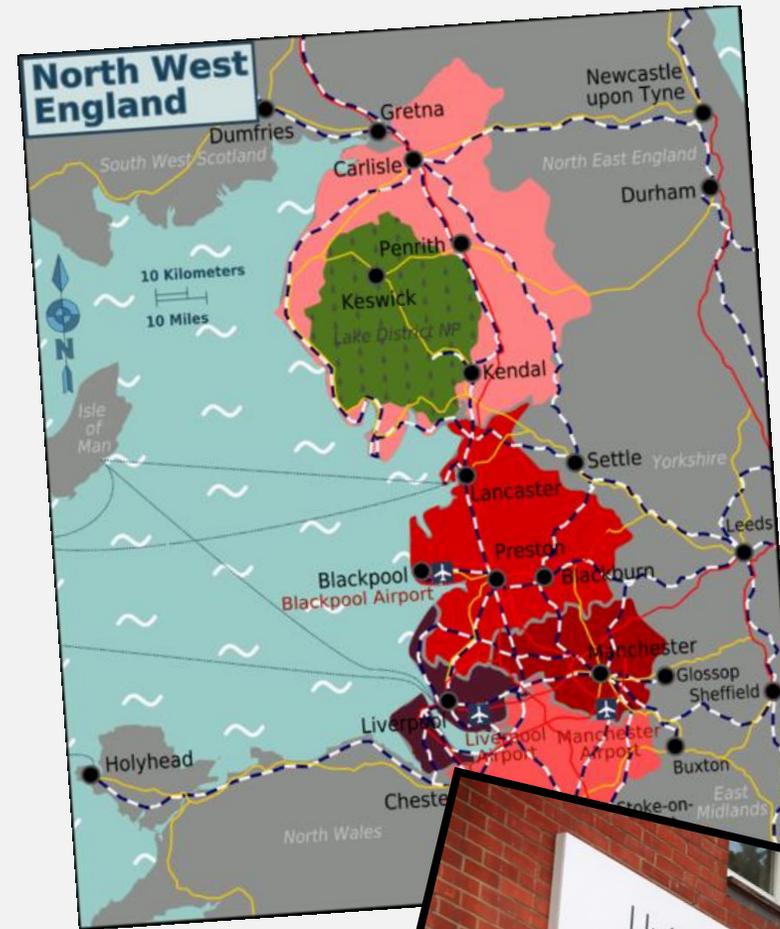

OUR UNIVERSITY OUR STUDENTS

5 campuses + 2 gateway sites

Developing a curriculum relevant to the region e.g. nuclear power industry in West Cumbria

Many professional courses e.g. nursing, midwifery, counselling, paramedic practice. Students may not as strong academically but have strengths in their skills

(West, 2012)

61-65% of students classed as Widening Participation

55% of postgraduate students are part-time

21% distance learning students

41.3% from lower socio-economic groups

20.5% from low participating neighbourhoods

59% over 21 at the start of their studies

University of
Cumbria

SUPPORTING STUDENTS PRE-ENTRY

Lack of preparedness for HE is one of the main factors for students not completing their course (Murtagh, 2012)

Interventions at pre-entry stage can provide key information about the University ensuring students arrive with realistic expectations + can help to develop the students' own confidence (HEFCE, 2012a)

Most UK HEI's prioritise the area of transition + the 'first year experience' as they are recognised in improving student retention + success (Thomas, 2012)

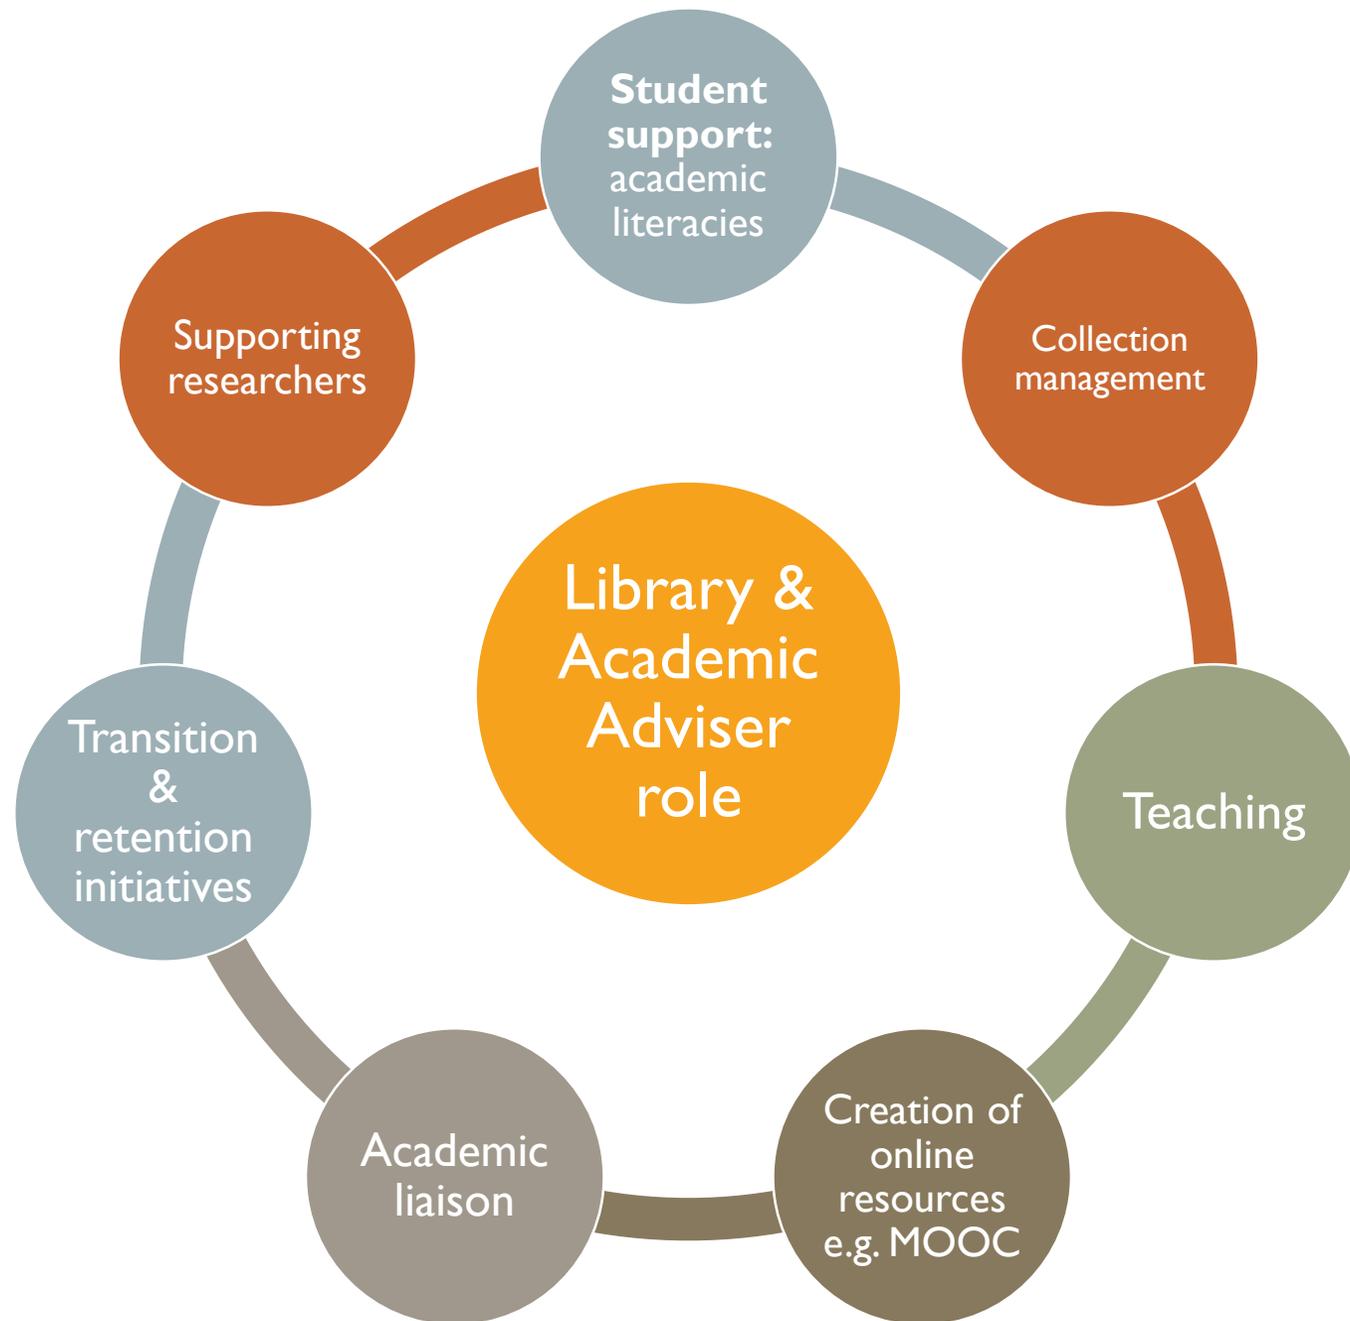

INTRODUCING THE TEAM

Collaborative work with Skills team,
learning technologists + academics

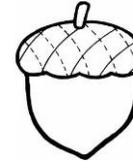

Blended role of academic and skills
adviser – skills set includes librarians,
information literacy (IL) practitioners,+
learning development expertise

Create integrated IL & academic skills
teaching & learning activities including
online learning resources such as Head
Start

A TINY ACORN

- ✓ **Head Start** study skills module created as the first pre-entry module in 2012
 - ✓ Transition to L4
 - ✓ Available through the Blackboard VLE
 - ✓ Key aim to “**raise confidence levels and in part prepare students for the demands of studying at university level**” (Fraser, Shaw & Ruston, 2013, p. 129)
 - ✓ Offered to firm & insurance places from May onwards for September entry
 - ✓ Originally developed as an accredited module
 - ✓ 5 Head Start subject pathways
- ✗ Workarounds needed to ensure students are able to access VLE before registering

ASSESSMENT IN HEAD START

All assessments are self-marking quizzes

Scores feed into Grade Centre in Bb

We can see when a student has passed, when they last logged on, etc.

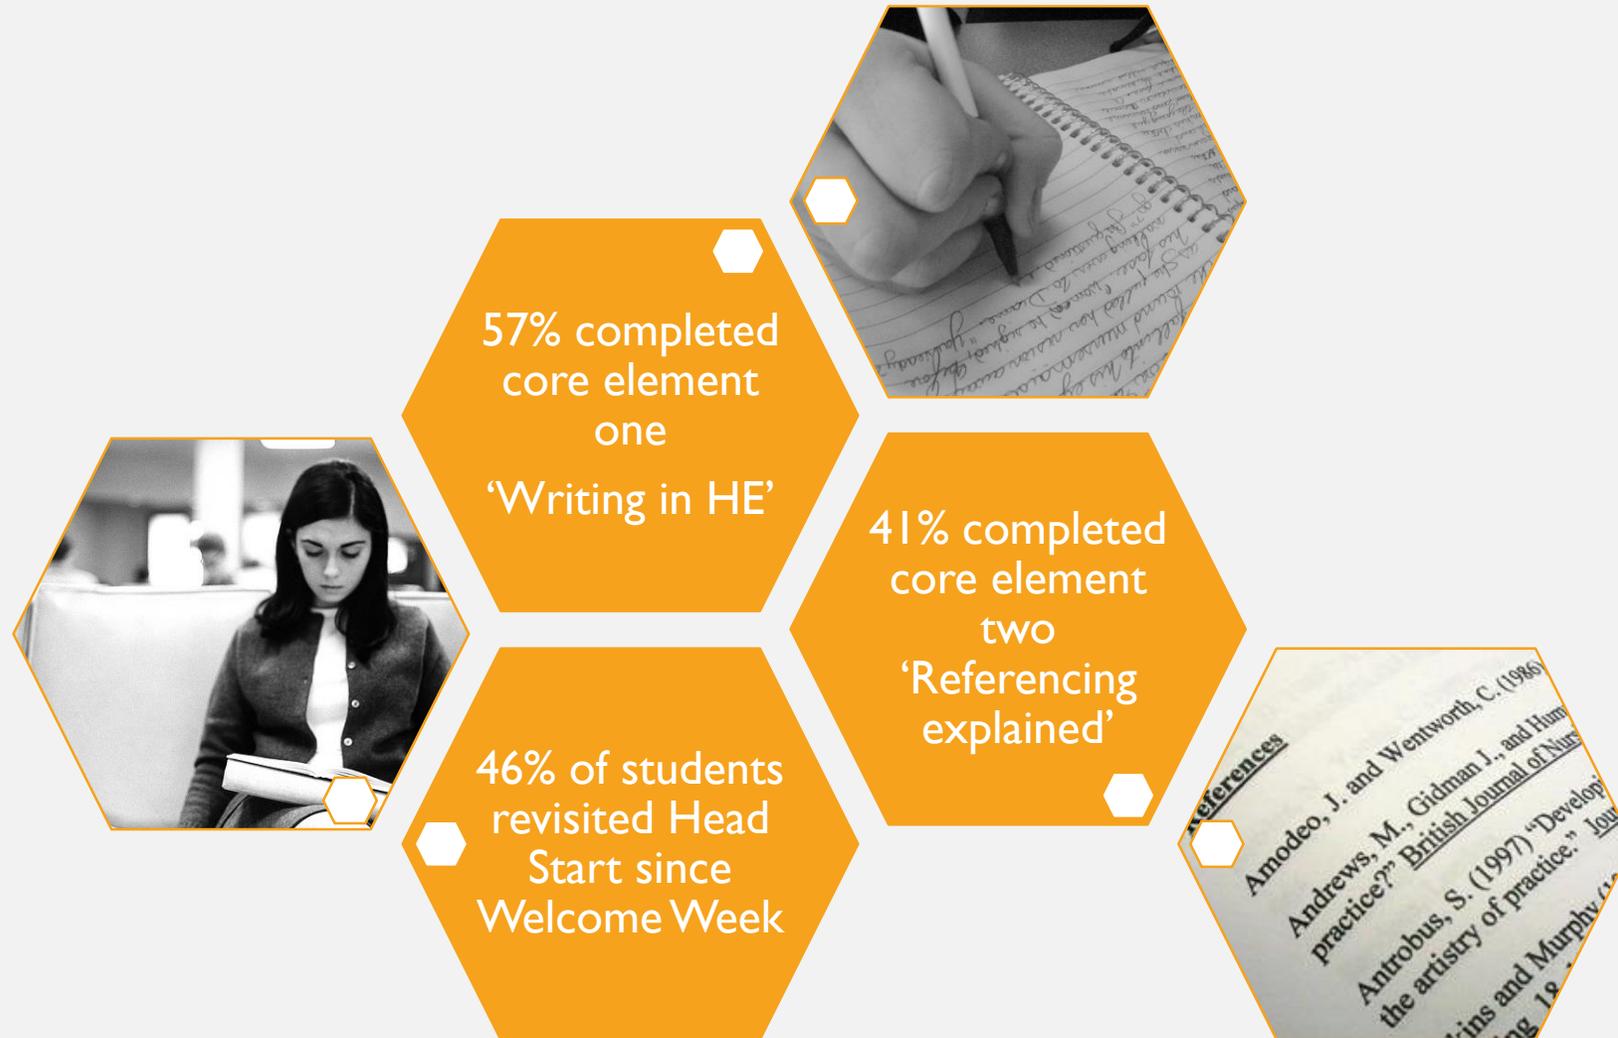

FEEDBACK FROM ADVISERS

“A significant proportion of students we taught had engaged with Head Start. In particular we found Head Start students to be notably more confident and appropriately vocal in sessions.”

Kim McGowan, Information Literacy Award Winner 2013

EXPANDING THE PORTFOLIO

Previous research highlights that transition at Masters level is *particularly important* for students studying on a more practical course (such as counselling, nursing or CBT) and that we should **not make assumptions** and expect postgraduate students to arrive with the study skills necessary for M-level study

(West, 2012; Tobell, O'Donnell and Zammit, 2010; O'Donnell *et al.*, 2009; Watson, Johnson and Walker, 2005; Grotzer, 2005).

FROM HEAD START TO MOOCS

- Requests for pre-entry modules at levels 5,6 + 7 for health students
- L7 module piloted with cohort of officers from Sandhurst Military Academy, incorporated discussion board monitored by army and academics
- L7 education version created for PGCE/ School Direct students
- Originally created in Blackboard but not sustainable with workaround to pre-register students prior to induction
- Launched University's first MOOCs in 2014 using Blackboard Open Education: Head Start Plus (L5+6) + Preparing for Postgraduate Study (L7)

CREATING THE MOOCS

Articulate Storyline

Interactive – includes videos, audio files, drag-and-drop, self-assessed quizzes and links to internal + external resources

Flexible format – menu allows user to select relevant sections

Referencing Explained module used across all levels

Bite size chunks

Expected to take 10-12 hours to complete whole module

“Key advantages of e-learning for the development of academic literacies are that it can facilitate deep learning, offers more flexible learning opportunities for students & provides instant feedback”
(Wingate, 2009, p. A16)

THE LEADERSHIP & MANAGEMENT AWARDS 2014 WINNER

Outstanding Student Services Team

SUCCESSSES

Vice-Chancellor's Awards for Excellence in Teaching & Learning 2015

Lesley English

is awarded a Vice-Chancellor's Award in Teaching & Learning for the contribution made to a teaching team. These awards are made in recognition of outstanding work in relation to teaching and the support of learning at the University of Cumbria.

THE LEADERSHIP & MANAGEMENT AWARDS 2016
OUTSTANDING LIBRARY TEAM

SMALL SCALE RESEARCH

'Can an online study skills module be effective in preparing non-traditional health students for a Masters level programme of study?'

Measure the study skills competencies of the students accessing the course, using a self-assessed skills audit at the start and end of the module.

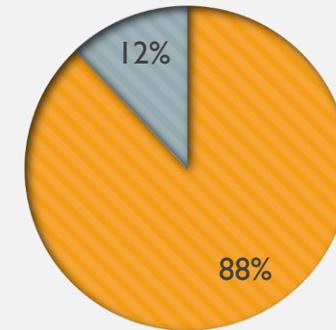

To investigate whether the students' confidence in their own study skills have increased through participation in the course.

To determine to what extent completion of the study skills module affect the student's overall pass rate on their programme of study.

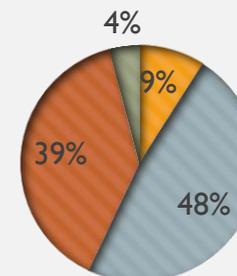

METHODS AND SAMPLE SIZE

- 77 students across 3 health programmes
- Mixed methods study which included the use of a skills audit, online questionnaire and a focus group
- Grades of the 1st summative assessment compared of those who engaged with the MOOC and those who didn't

■ Female ■ Male

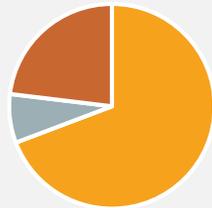

Age categories

■ 21-30 ■ 31-40 ■ 41-50 ■ 51-60

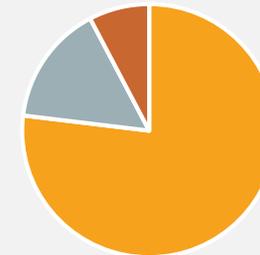

KEY FINDINGS I: QUESTIONNAIRE

Do you think that by accessing the MOOC you felt prepared for studying at Masters-level at the University of Cumbria?

■ Yes ■ No ■ Not sure

Do you feel that by accessing the MOOC you felt more confident about studying at Masters-level?

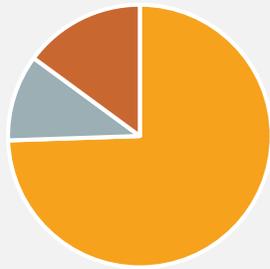

■ Yes ■ No ■ Not sure

A photograph of a circle of ten chairs arranged in a ring on a grey floor against a grey wall. Nine of the chairs are white, and one chair in the center of the ring is bright orange. The chairs are modern, with curved backs and thin metal legs.

“I found [the MOOC] offered confidence in new skills and a remembering of old skills. It allowed me to undertake September with confidence and a deeper understanding of the skills I needed” (Student 11)

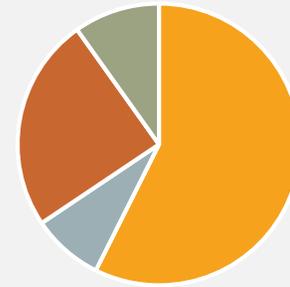

KEY FINDINGS 2: QUESTIONNAIRE

Do you think that academic skills can successfully be delivered through a purely online course?

■ Yes ■ No ■ Not sure

What is your preferred mode of delivery e.g. online, face to face or a blended model?

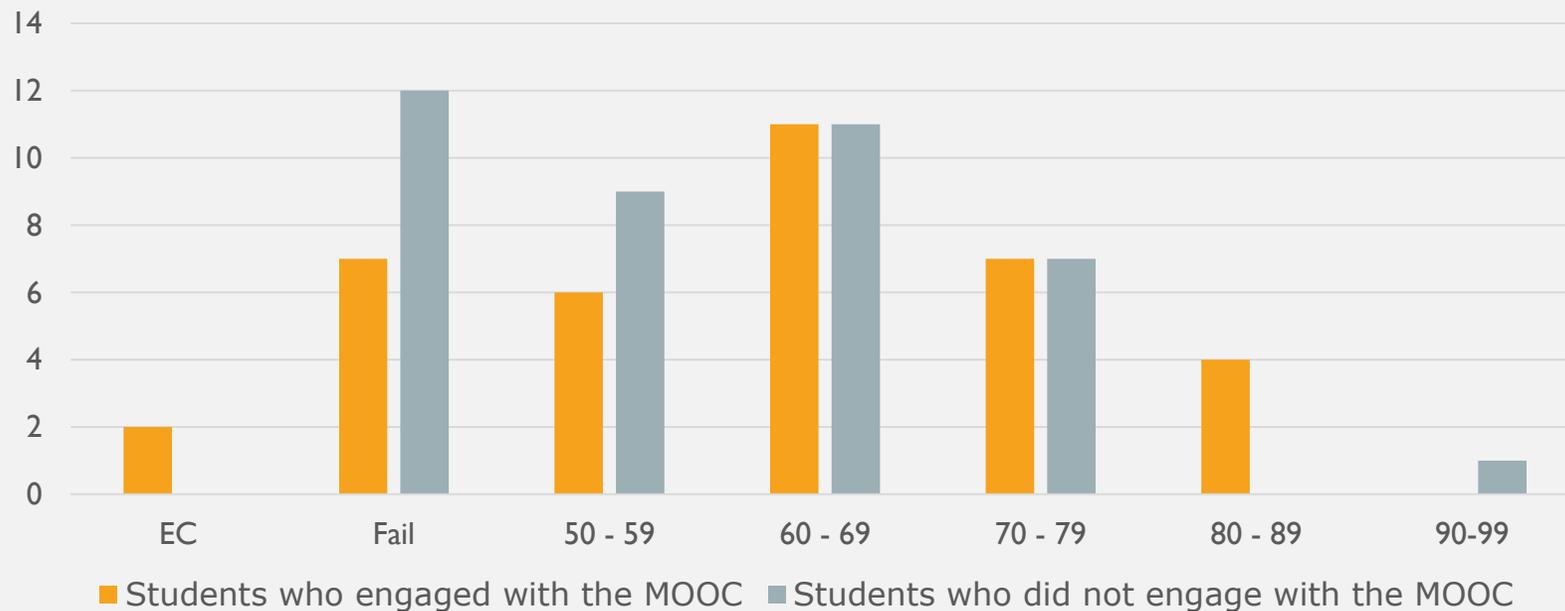

■ Online ■ Face-to-face ■ Blended ■ Not sure

Many declared that a purely online course can be an effective method of delivering study skills.

However, they emphasised the need for some sort of **online forum** to be incorporated to develop an online community of learners.

COMPARISON OF GRADES FROM 1ST SUMMATIVE ASSESSMENT

Engagement with the MOOC seems to have had a positive influence on the grades for the first summative assessment. Students were less likely to fail the assessment if they had accessed the online skills module.

BENEFITS + CHALLENGES

Sustainable and accessible package of pre-entry support helps with recruitment, retention and achievement

Build effective partnerships with learning technologists + academics

Individual sections can be used separately

Used alongside taught skills workshops to scaffold learning

Useful not only as pre-induction tool, but as the student progresses through the course

BENEFITS + CHALLENGES

Using new software + lack of technical expertise in using Bb/ Blackboard Open Education/ Articulate

Enrolment issues in Bb

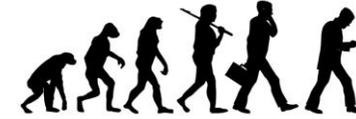

Can't be complacent – need to regularly evaluate, update + refresh content

Small team means that if there's a crisis there may be no-one to fix it!

Time...

MOVING FORWARD

- Head Start module to move to Blackboard Open Education (one version with subject specific discussion boards)
- Head Start no longer seen as a conversion tool so will be launched in August + used as a retention tool
- MOOCs – introduction of reflective question at the end of each section will allow us to monitor engagement through the Grade Centre. Each completed section generates a badge + full set of badges = self-generated certificate
- Development of skills audits can provide a method of assessing the students' increase in skill level and confidence + motivate the students to learn (Verhey, 1999; Ivanitskaya *et al.*, 2008)
- Introduction of discussion boards in MOOCs to encourage a sense of community in online learning (Shea, Li and Pickett, 2006)
